SUMMARY

Aspiring Software Engineer with a strong foundation in programming, web development, algorithms, and data analysis. Experienced in developing applications and personal projects using JavaScript, Python and React. Eager to gain industry experience and grow within a collaborative development environment.

EDUCATION AND EXPERIENCE

University of the People | Pasadena, California

Bachelor of Computer Science (2024 – 2026)

- **Relevant Coursework:** Computing in Python, Object-Oriented Programming, Databases, Web Applications, Data Structures

Deloitte Australia | Cyber Job Simulation - Forage (June 26 2026)

- Analysed web activity logs and identifies suspicious user behaviour in a simulated cybersecurity breach activity.

Mayerfeld Consulting | AI – assisted Frontend Development Practicum (Nov 2026)

- Collaborated with a small international team to develop websites, games, and applications using HTML, CSS, and JavaScript.
- Utilized AI-assisted tools for problem-solving, team planning, and debugging.

Google | Google Data Analytics Professional Certificate | Coursera (Nov 2023)

- Completed professional training in data analysis, data cleaning, data visualization, spreadsheets, and SQL.
- Gained practical experience working with real data to make data-driven decisions.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, R, C#
- **Web Development:** HTML, CSS, React, Vite
- **Tools & Technologies:** Git, GitHub, VS Code, RStudio, Excel, Pandas, NumPy, Plotly, Streamlit
- **Databases:** MySQL, Google BigQuery
- **Additional Skills:** Data Analysis,Log Analysis, Web Security and Debugging

PROJECTS

Movie Recommendation Website | React, JavaScript

- Developed a responsive website that recommends movies using an external API.

Personal Finance Tracker | Python, Streamlit

- Built an interactive application for tracking and managing personal finances.

Mermaid Jumping Game | JavaScript, HTML, CSS

- Developed game controls, player movement, obstacle interactions, collision detection, and scoring.

Console-Based Choice Game | JavaScript

- Created an adventure game with puzzles, branching decisions, and game-state management.
